

Dear Antlers Park Neighbor:

The Colorado Springs Parks, Recreation, and Cultural Services Department has received a request regarding the relocation of steam engine #168, which is currently on display in Antlers Park. The Cumbres & Toltec Scenic Railroad has asked the City to consider leasing them the locomotive. They would like to restore it to working condition and operate it on their original section of the Denver and Rio Grande Railroad.

The Parks Department will hold a public meeting to solicit input on this proposal:

6:00pm, Monday, October 27

Parks Administration Building, 1401 Recreation Way

For more information about this meeting please contact Matt Mayberry at 385-5636.
We appreciate your attendance!
