

Alamosa, Colorado
October 19, 1939
File 34

~~Mr. F. A. Jester~~

I have yours of October 16, with reference to equipping marker lamps with yellow and red lenses in lieu of red and green lenses.

We shipped to Mr. Liebush two of the five markers which he needed to equip engines and wagons on October 4, which was all we had in stock at the time, and we shipped three more by baggage on October 17. Five yellow lenses, or enough to equip three lamps were shipped on October 17.

We received from Durban this morning, 12 lenses which are being forwarded to Mr. Liebush tonight, and we will ship enough for the two remaining lamps as they are received.
