

CLIMAX A-313 DRAFT 9/13/2021

(c) W. E. Simonton III & CORRY R.A.I.L.S.

Appearance correct although all dimensions will be rechecked and confirmed (or not). Belt Rail may be high by an inch or two as the known dimensions of the window were used to place belt rail.

Arch of Roof Bows slightly high as no measurements have yet been made. Based on Notes and Sketches of Keith Christenson and parts at Corry, PA. Some conflicting measurements must be reconciled and only partial measurements are available. Some measurements may not become available due to lost or damaged parts. Although shown with equal width deck planks, the actual planks varied widely. No dimensions show as almost all are subject to change.
